DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to method of calibrating a plurality of gas analyzers by supplying a time varying mixture of mixed first and second gases and a carrier gas, classified in class 73, subclass 1.06.
- II. Claims 17-20, drawn to device comprising supply for mixed gas with flow controller, supply for carrier gas with flow controller, classified in class 73, subclass 864.81.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the device may be used with an analyzer supplier for purposes other than calibration such as functional test.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
